A SYSTEM AND METHOD FOR TRANSFERING DATA FROM A SOURCE MACHINE TO A TARGET MACHINE

ABSTRACT OF THE DISCLOSURE

A system and method are disclosed for providing data transfer between a source

5   machine and a target machine. In one embodiment of the present invention, a method

and system for transferring data comprises performing a first operation wherein the first

operation copies a first file from a first memory to a second memory, and a second file

from the first memory to the second memory, wherein the first file is copied substantially

concurrently with the copying of the second file, and wherein the first operation results in

10   a first copied file and a second copied file in the second memory; and performing a

second operation wherein the second operation updates the first copied file and the

second copied file in a predetermined order.
